

A Better Way Of Publishing

The Established Process of Scholarly Publishing

The PEvO Process of Scholarly Publishing

Knowledge. Globally archived

PEvO

PEvO is the Front-End to Science. A nice user-friendly application to serve the needs of academia and to involve every other curious mind.

steem

Steem is a distributed database - a so-called blockchain, archiving the metadata, the links to the attached file(s) and all the other relevant information on the article.

IPFS

The InterPlanetary File-System is a peer-to-peer web protocol. It locates the file(s) referenced in the blockchain (scientific paper; optionally raw data), insuring permanent availability.
